Ex-Congressman Barr Against the Plate Glass Deal.

HE ALLEGES CONSPIRACY

To Build and Sell the Ford City Works and Make \$900.000.

A SINGLE MINORITY MAN'S KICK

Against the Profitable Pool Pittsburg Has Lately Yielded.

HE SUES IN UNCLE SAM'S TRIBUNAL

A DISPATCH reporter has been cognizant placidity of the Pittsburg Plate Glass Company's inside workings.

These ripples took a turbulent turn yesterday, when a bill in equity was filed in the United States District Court (as the plaintiff now resides in the far West) by Sol Schoyer, Jr., with ex-Congressman Samuel F. Barr, tormerly of Harrisburg, for ioin therein, as plaintiffs against the Plate Glass Company, having for its President Edward Ford; Artemus Pitcairn, Vice President; Emory L. Ford, Secretary, and John Pitcairn, Jr., all as defendants.

The bill is quite lengthy, containing 14 clauses, which explicitly say the defendants err as against the Pittsburg Plate Glass Company (or rather its minority of stockholders) in carrying on business in the manner they have since the organization of the first company at Creighton, some four or five years ago. The plaintiff, therefore, prays the Court to come in and

RESTRAIN THE MESSRS, FORD et al from reaping profits not due them in their actions toward the "small tish" of the stockholders. In substance it is alleged about as follows:

J. B. Ford & Sons were the promoters and organizers of the first Pittsburg Plate facilities being exceptionally well adapted company in the United States-induced and impelled the proprietors to branch out, and propose to the stockholders that other works were needed.

At the first meeting to consider it there were a few dissenting votes, among which was that of the defendant, Mr. Barr. However, the second mill was built at Tarentum, half a mile above the first one, at a cost of \$700,000, with a monthly production of 140,-000 square feet.

Readers of THE DISPATCH will remem ber how, recently, the majority stockholden of the company voted to absorb the third works, at Ford City, with a capacity of 200,000 feet per month, at a cost of \$1,968,-750. In this connection now the plaintiff charges that this is "an exorbitant and outrageous price," which the stockholders may be subjected to pay, and that is the point of argument. Mr. Barr, the petilouer, expects to prove that Edward Ford. Artemus Pitcarra, Emory Ford and John Piteairn, Jr., "entered into a conspiracy to build a larger plate glass works than the mill No. 1, which plant they will compel the Pittsburg company to purchase, at enormous figures, or this (the defendants') own price, in order to prevent dangerous and menacing competition."

WHO BOLD THE BONANZA.

The stock is divided up so as to give the defendants a controling interest, the Fords', father and sons, having alone 3,350 shares; John Pitcarn, 1,000; John Scott, deceased, 1.000: Albert E. Hughes, 100; J. H. Sheilds, 250; William Nelson, 200, and Charles W. Batchelor 100. Mr. Barr has about 200. It is claimed by him that the parties to the scheme, being a majority, would of course vote for the purchase of the new mill at Will be Awarded. Ford City-which is now partially being operated—and "a repetition of the Tarentum scheme will have have been perfected." Company for \$750,000 first mortgage bonds, hat the Ford works won't cost over \$1, 500,000, although he says the people in he estimate or cost of them. As the actual premium on the stock commands \$622 per hare, this shows that the actual cost will e \$1,968,750, instead of \$1,500,000, as is said All these actions Mr. Barr sets forth as

being a direct threat and menace to compe the minority of stockholders to accede to the demands of the syndicate; and of course the favorable vote was assured by J. B. Ford et al. "The capital stock," it is "is to be increased \$2,750,000,

To wipe out the minority holdings and compel them to accept any price the major-ity may offer for their stock." In other words, it is another ease of "big fish eating up the little ones." By the consummation of the deal at the

proposed figures, the syndicate would, according to the allegations, profit over \$900,000, and the point which the plaintiff, Mr. Sarr, wants to score is that the Court be asked that they be made to accept the actual cost price of the mill, with such reasonable profit as the Court may allow to the con-structors. Also that they be asked to socount for all the money alleged to have been received by them in payment for works No.

statement of the property, real and personal, at Ford City, which was offered to the Pittsburg Plate Glass Company. As a comparison, the Howard Glass Works, now in the course of construction, is cited, and it will ost \$500,000, with a production of 100,000 square seet per month. As each square foot of glass requires an invested capital in works of \$5; No. 1, No. 2 of the Pittsburg Plate Glass Company and the Howard Works show this proportion exactly. "How, then," it is asked, "can the Ford City Works differ materially from this basis? If it does not differ, then the Ford City Works did not cost over \$1,000,000, and the contractor's This is given weight by the following comparative figures: The cost of Mill No. 1 was \$500,000; monthly production, 100,000 square feet. No. 2, \$700,000; production, 140,000 feet. Ford City, \$1,968,750, with only 290,000 feet production, while the Howard cost \$100,000 and her approduction, while the Howard cost \$100,000 and her approduction of \$100,000 and her approximation of \$100,00

I cannot but see that all of us are profited, just as we were when No. 1 and Tarentum consolidated. J. B. our property or increase the value of the stock. I am sorry I have nt more of it. We held several meetings in regard to the proposed plan, and the minority were against it until the last meeting held at the Monongahela House, when the majority of the minority tavored it."

E. H. Myers, the Liberty street pork packer, another stockholder, explained at length his view of the matter, and, although

tavoring the consolidation to a great extent, didn't think the profits from both stock dividends, and in excess of the actual cost of the plant, should go to the big holders of stock. "However," said he, "I do not care to say anything at all, for fear that I may be mistaken in my views. I would suggest you talk to Mr. H. P. Dilworth." This latter gentleman was seen by THE DISPATCH representative; but he would not consent to an interview.

A CONSERVATIVE VIEW. for some weeks of the fact that existing rip-ples of dissatisfactian were agitating the minority was so overwhelmed that there was nothing to do but to submit to deteat philosophically. In the abstract he was right; but, from a business point of view, the practicability of his plans was defective. The Messrs. Ford and Piteairn demonstrated their sincerity when, at the last meeting, they said: Gentlemen, we are in a delicate position; we leave it entirely to the vote of the minority.' I am altogether sat-isfied with the result, as it surely will have himself and all others who wish to lawfully a good effect on the stock. To-day a friend of mine offered \$180 per share for some; but could not secure it."
Other stockholders were approached, but would not talk, and now the case as it

stands will be awaited with interest, as it is. to an extent, without parallel.

TRIAL OF MASTER WORKMAN ROSS.

"The half has never been told" regarding the importation of the foreign window glass blowers; and the repeated remarks of labor. leaders, who are guarded in the information they give out, that "something will drop soon," are very significant. A DISPATCH reporter was yesterday informed of a portion of the news regarding the second halfof the importation that soon will be brought out. The persons who brought the men over are, it is averred, to be punished ording to the penalty provided in the ontract labor law, and some of the witnesses against them are to be brought here from across the ocean. The person, or organization, that is to pay the expenses of the trial —and it will certainly be an expensive one —could not be identified for publication as

the importation. The statements made within the past few weeks, that there are not enough window glass blowers in this country, is not correct, and I can prove it. A letter was received here recently from an English blower, stating that he had been invited to cross the water to secure a job. His reply was: 'If I can obtain work and maintain my position as a union man, I will come.

To Come and Hear the Charges Agains Master Workman Ross. A Kansas Prohibitionist Falls Down The prosecution, or rather the seeming

persecution, of Master Workman Ross, of D. A. 3, K. of L., will likely be carried out to a finish, although there was enough evidence produced at the trial on Friday night to vindicate him. This is one of the most peculiar matters ever brought up for trial in the district court of the Knights in this section and for the first time in the history of the order in this city a foreign court will have to be brought here to try the case.

The District Court of D. A. 3 is composed of Judge Homer L. McGaw, Judge Advocate Joseph L. Evans and Clerk John D. Hughes. The last two named are dis-qualified from serving, as they are both

qualified from serving, as they are both witnesses in the case.

At the meeting on Friday it was decided to bring the Judges from the two adjoining district assemblies to take their places, and Mr. McGaw will be the presiding judge. These districts are No. 8, composed of Beaver Valley, and No. 11, which embraces the local assemblies in the Connellaville coke region. The court will meet some time next week, at which it is expected there next week, at which it is expected there will be some interesting developments.

Another investigation will likely follow to ascertain the names of the persons who made the matter public, for, according to the rules of the order, not even a Knight of Labor is supposed to know anything about charges until after a trial and conviction.

Mr. McGaw was seen last night, and when the above was mentioned to him, said as Presiding Judge o. the court that would hear the charges and evidence, he had nothing whatever to say on the subject.

ANOTHER BLUPP PAD.

How Impecunious Dudes Wear Good Clothes by Trickery.

There is nothing so humiliating to a \$10--week dude as to be compelled to wear helf clothing, and to allay all suspicion he resorts to numerous sly tricks. One of the latest capers which is being practiced upon "an unsuspecting public" is that of securing from a merchant tailor a silk tab with his name on it, which is placed in the back of a ready-made coat, giving it a bona fide appearance of being made to order. A DISPATCH reporter stood in a Smith-field street shop yesterday, when a spruce young fellow leisurely sauntered in and walked to the rear of the room. He awaited until the proprietor approached, when he familiary asked him for one of his coat tabs. As the fellow had patronized the merchant to some extent, he couldn't very well refuse After he had retired to the street the tailor said: "This world is full of bluffs,

As a direct result of the terrible storm of night before last five fatalities in or near sudden rise of Butchers' Run. two others, drowned in Butchers' Run, and another, a brakeman killed in the wreck of cars at a washout.

The storm in Allegheny was more serious than was reported yesterday morning, for in addition to the damage to property over there, four lives were lost. They were John Dougherty, of Wood's Run, who was crushed by a fence and then drowned; John Kocher, who was drowned in a cellar in

Rocher, who was drowned in a cellar in Butchers' Run, and the two little girls, Gertrude and Louisa Shaffer, of Spring Garden, whose deaths were mentioned in yesterday's issue of this paper.

Mr. Dougherty was a grocer in Woods' Run, and his place of business is on Mc-Clure avenue. About 11 o'clock Friday night he left the house to see if there was any immediate danger. He did not return, but shortly after he left the house his wife heard a crash of a fence and timbers against the house. About 1 o'clock yesterday morning his lifeless body was found among the debris near the house. Dougherty was 35 years of age.

FOR SHORTER HOURS

Pattern Makers at Their Annual Gathering Will Recommend

THE EIGHT-HOUR SYSTEM OF WORK A League Only Two Years Old Spreading and Growing Rapidly.

LABOR PROBLEM TO BE CONSIDERED

The second annual meesting of the Pattern Maker's League of North America will be held in the Seventh Avenue Hotel this week, beginning to-morrow morning. About 25 delegates are expected, but last night none of them had arrived, though the reception committee was at the hotel waiting for them. The eastern delegates are scheduled to arrive this morning.

Speaking about the association and the coming meeting, President T. J. McGon-nell of this city, said last night; There are only 6,000 pattern makers in the country, and 1,000 of them belong to the organization. In Pittsburg there are 150 pattern men, and 95 belong to the local assembly. At present we are trying to establish an association in Hamilton, Canada, and outside of this place we are not represented in the Dominion. We have associations in 16 cities scattered over the country, and we expect representatives

from all of them. WORK TO BE DONE. The meeting will probably last, the greater part of the week, and we intend to have a banquet Thursday evening. There are a number of things to be considered. The constitution is of things to be considered. The constitution is crude, was hastily constructed and needs to be modified in some particulars. We are thinking of establishing a contigent fund to work up associations in new fields, strengthen weak budies and to assist generally in keeping the organization together. It is more than probable that we will appoint a paid organization. The tools of pattern makers are very valuable, and at present we have a plan of insurance to protect them from loss. This insurance feature will be perfected further, and, in addition, we will discuss the advisability of establishing a beneficial feature in connection with dition, we will discuss the advisability of establishing a beneficial feature in connection with
the League.

Another thing we are anxious about is the
eight-hour system and the abolition of piece
work. These subjects will be considered. It
is the aim of the League to keep up the agitation for shorter hours of work, and we prefer
to work by the day. The quality of work
turned out is better than by the piece.

SHARP MANUFACTURERS. We find, too, that when a man exerts himself and makes some money at piece work that when we work by the day the manufacturers expect us to do as much as we do under the expect us to do as much as we do under the piece plan. In the end we find we make less money and work longer hours under this system than by the day.

The question of limiting the number of apprentices will also come up. For myself I think that one to every six journeymen should be allowed and no more. As to strikes we are very conservative, and have no desire to be antagonistic or pugnacious unless there is grave necessity for it.

At the session to-morrow morning, President McGonnell will read his annual address. He states there are some points of interest in his report, but he declined to speak of them in advance. He will also suggest some new ideas that he has mapped out. The officers of the league are: P. P. Duchemin, Secretary, Boston: General Vice President, William Case, New York; Exsecutive Board, Thomas Moon, Philadelphia; W. H. Lose, Allegheny and Louis Kirchberg, Chicagot Local Reception Committee, G. N. Heaslet, Harvey Heaslet, W. McLean, Joseph Knipschild, J. F. Wakeman, C. B.
